DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6, 23-27 & 31-35, drawn to populations of mammalian CNS multipotent neural precursor cells, classified in Class 435, subclass 368.
 - II. Claims 28, 30, 36 & 38, drawn to populations of mammalian CNS glial-restricted precursor cells, classified in Class 435, subclass 368.
 - III. Claims 29 & 37, drawn to populations of mammalian CNS neuronal-restricted precursor cells, classified in Class 435, subclass 368.
- 2. The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relation of Inventions" in MPEP 806.05 for inventive groups that are directed to different products, restriction is deemed proper because these products appear to constitute patently distinct inventions for the following reasons:

Groups I-III are directed to products that are physically and functionally distinct, which include cell cultures comprising distinct populations of CNS neural stem/precursor cells. The cell populations of Group I are a fundamentally different and distinct population of neural precursor/stem cells that can give rise to both neuronal and glial cells, unlike the distinct CNS neural cell precursor populations of Group II that are glial-restricted precursor cells, and unlike the distinct CNS cell precursor populations of Group IV that are neuronal-restricted precursor

Application/Control Number: 10/047,352

Art Unit: 1647

cells, and vice versa. It is pointed out that there is a proper distinction between these groups, since each product is not required in order for the other to exist. Thereby, these groups are distinct and separable for the reasons stated.

Because these inventions are distinct for the reasons given above, and the lack of coextensive-ness of the search and examination for each group would constitute an undue burden on the examiner to search and consider all the separable groups, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Robert Hayes whose telephone number is (571) 272-0885. The examiner can normally be reached on Monday through Thursday, and alternate Fridays, from 8:30 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached on (571) 272-0961. The fax phone number for this Group is (703) 872-9303.
